Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Sunday 17 Oct 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Rather cloudy and damp. Some brighter spells possible later.

Today:
A mild start, but rather cloudy and damp, with patchy light rain and drizzle. The best of limited brighter intervals should develop in the east later, as rain becomes lighter and more intermittent. Light winds, extensive low cloud on hills. Maximum temperature 16 deg C (61 deg F).

Tonight:
Cloudy and damp during the evening, although intermittent light rain tending to die away later in the night, leaving a risk of fog and low cloud. Locally chilly by dawn. Minimum temperature 7 deg C (45 deg F).

Monday:
Rather cloudy to start, before likely brightening up for a time, perhaps with some warm sunny intervals. Becoming cloudier and breezier later, with further intermittent rain from the west. Maximum temperature 17 deg C (63 deg F).

Outlook for Tuesday to Thursday:
Unsettled and rather windy through this period, with spells of rain and blustery heavy showers. Temperatures starting well above average, but trending downwards after midweek.
